

<b>CLEANSER FOR SEPARATORS ZPA</b>	<b>Item no.:</b>  <b>00 11 92</b>
<b>Areas of application</b>	<p><b>Cleanser for Separators ZPA</b> is a special product for all cleaning operations in the inner side of systems.</p> <p><b>Cleanser for Separators ZPA</b> removes in particular all organic impurities which can be found in separators, plate pasteurizers or plate liquid coolers, whirlpools, pipes as well as filters and filling systems.</p> <p>Because of the thorough combination of chlorine and the other components the agent intensifies the cleaning effect and disinfects in one operation.</p>
<b>Method of application</b>	<p><b>Re-circulating or CIP, add the product with an automatic dosing system (time relay, volumetric control or control over conductivity):</b></p> <p>Concentration: 15.0 – 25.0 g/L (1.5 – 2.5 %)        Temperature: cold – 80° C        Time: 20 – 30 minutes</p> <p>After having used the product rinse thoroughly with drinking water to remove any possible residues!</p> <p>In case of insufficient rinsing in the 'dead areas' of the plant equipment and pipes or in gaps e.g. under seals it could come to the enrichment of chloride ions which can lead at pH values &lt; 7 to pit, hole and intergranular corrosion at stainless steel!</p>
<b>Material compatibility</b>	<p>PVDF, PP, PE, PVC, stainless steel, glass</p> <p><b>Cleanser for Separators ZPA</b> must not be used on aluminium, steel, cast iron and non-ferrous metal.</p> <p>In addition, further material incompatibilities cannot be excluded. Therefore, test the product on an unimportant spot before its definite use.</p>
