

<b>WIGOPHARM RV H</b>	<b>Item no.:</b>  <b>35 30 50</b>
<b>Areas of application</b>	<p><b>Cleaning concentrate for the Pharmaceutical -, Cosmetic and Foodstuffs industry.</b></p> <p><b>Wigopharm RV H</b> is a liquid additive used to intensify the cleansing effect of all alkaline solutions used to clean the inner side of systems as well as surfaces.</p> <p><b>Wigopharm RV H</b> decomposes its oxygen components very quickly so that all organic impurities are oxidised immediately.</p> <p><b>Wigopharm RV H</b> is free of detergents and doesn't influence the foam behaviour of the cleaning solution.</p>
<b>Method of application</b>	<p><b>CIP cleaning:</b> Add the booster in a ratio of 0.2 – 2.0 % to the cleansing solution. When using a recirculation pump system the solution can be heated up to 80 °C, but because of the intense release of oxygen it has to be made sure that there is pressure compensation. Re-circulation time: 10 – 20 minutes.</p> <p>After having used the product rinse thoroughly with drinking water to remove any possible residues!</p> <p>High concentration of chloride ions in the used water can lead to hole and intergranular corrosion at stainless steel when the time of application is longer as described in this data sheet. Different metals in the system can lead to corrosion if the product is used in re-circulation systems for a long time.</p>
<b>Material compatibility</b>	<p>Stainless Steel, PP, PVC, PE, PVDF.</p> <p><b>Attention:</b> When mixing the booster with other products both products have to be diluted prior to mixing! Because of the intense release of oxygen the booster is to be used in pressure vessels with pressure compensation only!</p> <p>In addition, further material incompatibilities cannot be excluded. Therefore, test the product on an unimportant spot before its definite use.</p>

<b>Analysis of concentration</b>	see titration method		
<b>Physical and chemical properties</b>			
<b>Aspect/colour</b>	Colourless		
<b>Form</b>	Liquid		
<b>Odour</b>	Odourless		
<b>Foaming behaviour</b> (see under conditions of application)	Not foaming		
<b>Phosphates</b>	None		
<b>Density (20°C) g/cm<sup>3</sup></b>	1.125 – 1.145		
<b>Concentration</b>	<b>1% in H<sub>2</sub>O dest.</b>	<b>3% in H<sub>2</sub>O dest.</b>	<b>5% in H<sub>2</sub>O dest.</b>
<b>pH value (1%, 20°C)</b>	5.0 – 7.0	not applicable	not applicable
<b>Conductance (1%, 20°C) mS/cm</b>	not applicable	not applicable	not applicable
<b>Phenolphthalein alkalinity (ml)</b>	not applicable		
<b>m-Value (ml)</b>	not applicable		
<b>Storage stability</b>	+ 5° C – + 30° C		
<b>Remarks regarding biocides</b>	<b>Not applicable</b>		
<b>Hazardous products and risk symbols</b>	Hydrogen peroxide <div style="text-align: right;">    <b>DANGER      WARNING</b> </div>		
<b>Special remarks</b>	<p>Always close the container with the original closure, and store the items in a cool area without solar radiation.          Product which was taken out of the container must never be poured back into the container.</p> <p><b>Read in any case our safety data sheet before using the product!</b></p>		
<b>Disposal</b>	Disposal acc. to official regulations, in case of doubt contact the manufacturer.		

Please refer to our safety data sheets and our operating instructions with regard to precautionary measures, first aid measures and storage.
