| <b>HIGH GLOSS DRYER</b>       | <b>Item no.:</b><br><b>00 05 10</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| <b>Areas of application</b>   | <p><b>High Gloss Dryer</b> is a high efficient rinsing concentrate to support the efficiency of the drying fan.</p> <p><b>High Gloss Dryer</b> is based on special components to break the water film and to destroy the consistent moisture of the surfaces. Thus the drops of water are growing and the fan is able to blow them from the surface for a better drying.</p> <p><b>High Gloss Dryer</b> contains a special combination of detergents which ensure a brilliant shine after having rinsed the surfaces with water.</p> |
| <b>Method of application</b>  | <p><b>Manual dosing into the water or into the chemical tank of the car washing machine:</b></p> <p>Concentration: 0.1 – 0.45 %<br/>         Temperature: cold – 40°C<br/>         Time: 1 – 2 minutes</p>                                                                                                                                                                                                                                                                                                                           |
| <b>Material compatibility</b> | <p>Aluminium, stainless steel, glass, tiles, ceramic, painted surfaces.</p> <p><b>High Gloss Dryer</b> must not be used on plastics, especially Perspex.</p> <p>In addition, further material incompatibilities cannot be excluded. Therefore, test the product on an unimportant spot before its definite use.</p>                                                                                                                                                                                                                  |
