<p>BOOSTER M</p>	<p>Item no.: 00 17 13</p>
<p>Areas of application</p>	<p>Booster M is an additive to increase the cleaning power of alkaline cleaning solutions. High efficient complexing agents are breaking mineral, rocky deposits and prevent the surfaces from salty sediments.</p> <p>Booster M extends the life cycle of alkaline bathes and prevents the precipitation of calcium and magnesium ions in case of extremely high water hardness.</p> <p>When the product is used in bottle washing machines the concentrate is given into the last station with alkaline solution in order to increase cleansing efficiency and achieve a more brilliant shine on the bottles.</p>
<p>Method of application</p>	<p>Add the product with an automatic dosing system (time relay, volumetric control) into the alkaline bath:</p> <p>Concentration: 0.3 – 2.0 % (depending on the hardness of water) Temperature: 20 – 90°C Spray-Pressure: 2 – 6 bar Time: according to the alkaline cleaning product</p> <p>After having used the product rinse thoroughly with drinking water to remove any possible residues!</p>
<p>Material compatibility</p>	<p>PVDF, PP, PE, PVC, Stainless Steel, Glass, Steel, Cast Iron</p> <p>Booster M must not be used on aluminium and tin-plated material</p> <p>In addition, further material incompatibilities cannot be excluded. Therefore, test the product on an unimportant spot before its definite use.</p>
