

Product properties – Technical sheet

<p>MICROL P-CF-A</p>	<p>Item no.: 41 28 40</p>
<p>Areas of application</p>	<p>MICROL P-CF-A IS ESPECIALLY DEVELOPED FOR THE USE IN PALL-MEMBRANE FILTERS</p> <p>Microl P-CF-A is a liquid, alkaline product with organic and inorganic complexing agents, free of silicates, for the removal of organic residues in membranes of filter systems and reverse osmosis plants (RO).</p> <p>Microl P-CF-A is based on a special structural materials to improve the soaking and the removal of the residues on the membranes.</p> <p>Microl P-CF-A prevents the cleaning solution from precipitation of water hardness.</p> <p>Continuous cleaning cycles improve the stability of the membranes and ensure a consistent throughput.</p>
<p>Method of application</p>	<p>Re-circulating cleaning system:</p> <p>Concentration: 1.0 – 3.0 % Temperature: 20 – 70°C Time: 10 – 40 minutes</p> <p>For the increase of the cleaning efficiency we recommend the additional use of Microl P-CF-H as additive in the alkaline cleaning cycle (see Art.-No. 412841 Technical Data Sheet).</p> <p>After having used the product rinse thoroughly with drinking water to remove any possible residues!</p> <p>Wet conservation: For wet conservation we recommend to fill the system with a 0.5 % solution of Microl P-CF-A or with Microl P-CF-S.</p>
<p>Material compatibility</p>	<p>PVDF, PP, PE, Stainless Steel, Glass, Cast Iron, Tiles and membranes suitable for alkaline cleaning solutions.</p> <p>Microl P-CF-A must not be used on aluminium and membranes made from cellulose and cellulose acetate.</p> <p>In addition, further material incompatibilities cannot be excluded. Therefore, test the product before use and ask the producer of the membrane if the product is compatible with the product.</p>

Product properties – Technical sheet

Analysis of concentration	according to the titration instructions		
Physical and chemical properties			
Aspect/colour	Clear	Colourless	
Form	Liquid		
Odour	Odourless		
Foaming behaviour <small>(see under conditions of application)</small>	Not Foaming		
Phosphates	n/a		
Density (20°C) g/cm³	1.340 – 1.370		
Concentration	1 % in H₂O dest.	3 % in H₂O dest.	5 % in H₂O dest.
pH value (1 %, 20°C)	12.6 – 13.2	n/a	n/a
Conductance (1 %, 20°C) mS/cm	13.5 – 16.5	39.5 – 43.5	65.5 – 71.5
Phenolphthalein alkalinity (ml)	5.9 ± 0.3 (1 % at 10 ml sample)		
m-Value (ml)	n/a		
Storage stability	+ 5°C to + 40°C		
Remarks regarding biocides	n/a		
Hazardous products	Potassium Hydroxide		
Risk symbols			
	DANGER		
Special remarks	<p>Always close the container with the original closure, and store the items in a cool area without solar radiation. Product which was taken out of the container must never be poured back into the container.</p> <p>Read in any case our safety data sheet before using the product!</p>		
Disposal	Disposal acc. to official regulations, in case of doubt contact the manufacturer.		

Please refer to our safety data sheets and our operating instructions with regard to precautionary measures, first aid measures and storage. The information given in the Sheet corresponds to the present state of our technical knowledge and experience. They do not constitute any guarantee; they are to be considered as basic information only. In particular they do not guarantee particular properties or the suitability for a concrete purpose. Because of the multitude of possible influences during the application of our products, the user has to make in any case the relevant tests and take the corresponding precautions.
