Product properties – Technical sheet

FO		Item no.:	
PROTECTION		80 50 22	
Areas of application			
	FO Protection is an anti-corrosive agent based on mineral anti corrosive agents, to protect surfaces made from Steel and cast iron.		
	FO Protection can be used on all metallic surfaces as well as other machinery and equipment during long term production breaks.		
	FO Protection produces tight oily layers in order to protect the surfaces from dampness and oxidation.		
Corrosion protection			
	FO Protection has special components for corrosion protection to prevent sensitive material from corrosion.		
Method of application			
	Manual, using a cloth, paint brush special cases the parts can be tre Concentration: undiluted Temperature: 20 – 40° C (warming u application by spraying) Time: The product remains on the su	ated in a dipping process:	
Material compatibility			
	Stainless Steel, Steel, Glass, Cast Iron, Copper and Aluminium.		
	FO Protection must not be used on In addition, further material incompa Therefore, test the product on an un inite use.	tibilities cannot be excluded.
